THE PRESI SIGNATURE. ALL AROUND THE WORLD.

MECATOME T202, the new generation precision cutting machine

BY PRESI

Precision cutting machine.

The MECATOME T202 is a cutting machine which distinguishes itself by its robustness and compact dimensions. It can cut a wide range of materials, from the softest to the hardest ones.

Maximum performance.

With a maximum speed of 4000 RPM, the MECATOME T202 works with diamond cut-off wheels as well as resinoids ones. It is perfect for using fine grinding wheels for the highest precision cuts.

CUTTING ENVELOPE*

* This illustration of the cutting envelope of the MECATOME T202 is to show the maximum theoretical capacity only. The actual capacity in practice will depend on the sample geometry and its physical properties.

Cutting mode

The MECATOME T202 allows two cutting modes:

- Manual
- By gravity (weight, counter-weight)

UNRIVALED ENGINE POWER

The powerful brushless motorization of the MECATOME T202 allows to work with constant torque over the whole speed range from 100 to 4000 RPM. The entire PRESI experience is concentrated in this most complete cutting machine on the market in its category.

Touchscreen

- LCD color TFT display 4,3", 16/9
- Ergonomic and intuitive user interface
- Easy to use thanks to the micrometric display of lateral movement
- Many features, changes and adjustments of cutting parameters

Sample carrier arm

The sample arm, adjustable in lateral position and in rotation, allows the attack of the sample from all angles.

PROTECTION HOOD LOCK FOR MAXIMUM SECURITY

The hood, made of metal frames, locks as soon as the engine starts and only unlocks when the grinding wheel stops.

LED Lighting

Improves brightness and facilitates visual control during operation.
